

# **EXSM 3934: CSS3 Fundamentals Assignment 1**

Deadline: Sunday Oct 17, 2021 at 11:59 PM

## Introduction

In this project you will put what you learned in manipulating fonts, images, and using selectors and pseudo-selectors to make a visually appealing and semi-interactive web page which contains the recipe to your favorite food. Below is a wireframe included which must be followed to earn full credit. To start, read the requirements carefully and reach out for assistance or clarification on the class forums if needed.

Your HTML and CSS must pass the [HTML Validator](#) and [CSS Validator](#) with no errors. Errors present in validation will result in a grade of zero on the assignment.

## Criteria

<u>Requirement Description</u>	<u>Maximum Point(s)</u>
Images:	
<input type="checkbox"/> Contains at least one image of the recipe	1
<input type="checkbox"/> Image(s) included should be to the left of the text (see wireframe)	1
<input type="checkbox"/> Image(s) should not have any noticeable distortions or irregularities	1
Font:	
<input type="checkbox"/> Recipe instructions are written in a custom (readable) font	1
<input type="checkbox"/> Font stack is defined for alternative fonts, including at least one common default system font, and a font group	1
Selectors and Pseudo-selectors:	

<input type="checkbox"/> Every line of recipe highlights when the cursor is placed overtop to help user keep track of progress	3
<input type="checkbox"/> Insert a hyperlink of the original recipe location online with colored text (other than the browser default blue)	1
General:	
<input type="checkbox"/> Layout is visually appealing	1
<input type="checkbox"/> Layout generally follows wireframe	1
<input type="checkbox"/> Appropriate use of headers, footers and sections to divide content in HTML	1
<input type="checkbox"/> <a href="#">HTML</a> and <a href="#">CSS</a> pass their respective W3C validators with no <u>warnings</u> .	2
<u>Grand total:</u>	<u>14</u>
